TOOL SETS

Stanley offers a complete range of fractional, SAE and metric sized sockets and 1/4", 3/8", 1/2" and 3/4" drive tools. Our socket sets combine the most popular tools for easy accessibility.

Stanley[®] drive tools are forged from high-quality steel and finished in high-polish nickel chrome or black chrome. Selected ratchet handles are ergonomically designed and have an easy-to-use, thumb-operated reverse-switch mechanism. Sockets and extensions remain locked onto the drive until disengaged with an easy-to-reach, low-profile quick-release button.

Stanley[®] sockets feature our **Max-Drive**[™] design, a unique radius corner design which provides 15% more torque to tighten fasteners easily and simplify the turning of rounded corners. **Max-Drive**[™] helps reduce fastener wear by minimizing contact on the outer 5% of the fastener; helping increase life expectancy. It also helps reduce slipping on frozen or rusted fasteners.

All Stanley[®] ratchets, sockets and wrenches are manufactured globally, to Stanley specifications, meeting and often exceeding ANSI specifications.

RATCHETS

Stanley[®] ratchets and accessories are designed to meet or exceed ANSI specifications. All are forged from high-quality steel and finished in high-polish chrome.

Selected Stanley[®] high-torque ratchets have a **Quick Release™** mechanism for one-handed use. Sockets and extensions remain locked onto the drive until disengaged with an easy-to-reach, low-profile quick-release button.

Stanley[®] Pear Head Ratchets have a slim profile and a small **7-degree arc-swing** for accessing hard to reach fasteners.

SOCKETS

Stanley® sockets feature our **Max-Drive™** design, a unique radius corner design which provides 15% more torque, making it easy to tighten fasteners and simplifies the turning of rounded corners. Helps reduce fastener wear without contact on the outer 5% of the fastener, so fasteners last longer. Helps reduce slipping on frozen or rusted fasteners. Stanley® sockets are manufactured worldwide with high-alloy steel and heat treated for performance.

TORQUESAFE™ SOCKETS

- Torque setting driver allows you to set torque on socket
- Socket will only apply preset torque then slip
- Proper Seating of Spark Plug allows better heat transfer
- Prevent damaged cylinder heads

IMPACT SOCKETS

Stanley[®] sockets feature our **Max-Drive™** design, a unique radius corner design which provides 15% more torque, making it easy to tighten fasteners and simplifies the turning of rounded corners. Helps reduce fastener wear without contact on the outer 5% of the fastener, so fasteners last longer. Helps reduce slipping on frozen or rusted fasteners.

These impact sockets are made of alloy steel for strength and durability, then heat treated to balance strength and hardness. The socket wall thickness is optimized to provide strength while retaining ample access to restricted fasteners. **All sockets meet or exceed ANSI specifications.**

WRENCHES

Stanley® wrenches are designed to meet or exceed ANSI specifications. The box end of the Stanley® Combination wrench employs the **Max-Drive™** system, which allows the box end to contact the fastener away from the corner. This system allows **15% more torque** to be applied to the fastener and helps reduce fastener rounding.

AIR TOOLS

NEW

This new generation line of Stanley® automotive air tools are full of new features and benefits designed to make your job easier. The line features TPR molded grips that dampen vibration, offer better comfort than metal handles, and draw less energy from your hand allowing you to work longer. Many of these new items have adjustable air inlets to control air into the tool and a directional exhaust allowing you to exhaust the air away from your face. From polished chrome accents to molded Stanley logos, this line clearly pays attention to ergonomics and style. With this line of air tools in your shop or garage, you will differentiate yourself with great tools backed by a three year limited warranty.

ILLUMINATION

Stanley adds LED flashlights to its tool line with the introduction of the Stanley® MaxLife™ Tripod, MaxLife™ 369™ and Mini Tripod LED flashlights. With its innovative tripod design, the Tripod and Mini Tripod Flashlights provide the user a hands-free option with just the push of a button. These new tripod flashlights also incorporate an articulating head which allows the user to aim a focused beam of light where needed. Like it's first cousin, the MaxLife™ 369™ Flashlight, the new Tripod is capable of generating more than 200 hours of continuous light. Utilizing parallel energy cell technology, in conjunction with six bright-white, solid-state LEDs, MaxLife™ products won't leave you in the dark. Traditional incandescent flashlights could consume as many as 10 sets of batteries before you would ever need to replace those in the new MaxLife™ Tripod flashlight. Weather-resistant and durable, this flashlight incorporates anodized aluminum space frame construction with a graphite/ABS composite head.

95-113 – MINI TRIPOD FLASHLIGHT

- Mini Tripod Design for Convenience
- Bright White LED Light
- 3 Button Cell Batteries Included

95-112 – MAXLIFE™ TRIPOD FLASHLIGHT

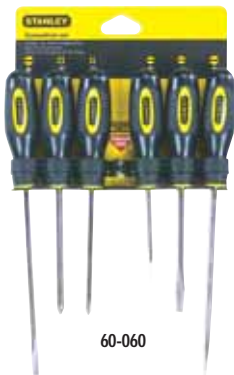

- Extended Run Time of 200+ Hours on a Set of Batteries
- Hands Free Tripod Design Makes it a Perfect Project/Emergency Light
- Articulating Head
- Low Power Indicator Light Flashes to Alert You to a Battery Change
- 4 Position Switch Allows User to Control Setting: Low, Medium, High or Off
- Runs on 3, 6, or 9 AA Batteries (Not Included)

95-369 – MAXLIFE™ 369™ FLASHLIGHT

- Extended Run Time of 200+ Hours on a Set of Batteries
- Low Power Indicator Light Flashes to Alert You to a Battery Change
- 4 Position Switch Allows User to Control Setting: Low, Medium, High or Off
- Runs on 3, 6, or 9 AA Batteries (Not Included)
